

The Murtagh Group

Company Profile

Introduction

Established in 1981, for over twenty years **The Murtagh Group** have been providing a competitive, efficient and environmentally sensitive service for blue chip companies in London and the Home Counties.

However complex the task, however demanding the deadline, **The Murtagh Group** have the skilled personnel, specialist equipment and the dedication to customer service which will ensure that the project is completed efficiently, safely, on time and within budget.

Services

Demolition (1 of 2)

Effective, safe demolition on industrial, commercial and public sector sites calls for specialist experience, skills and equipment.

Murtagh Demolition has all three - wide experience of full and partial demolition within the tightest physical and time constraints, a fully trained workforce, and the specialist equipment required for the most difficult or intricate work.

Services

Demolition (2 of 2)

Murtagh Demolition's service has three other important benefits - the flexibility offered by a round-the-clock demolition capability, a "green" attitude towards on-site materials processing and recycling and perhaps most importantly, the benefit of a high quality service at a competitive price.

Services

Re-Cycling (1 of 2)

Murtagh were the first in the UK to purchase the Vermeer TG400 Tub Grinder in 1995. **Murtagh** were also the first company in the UK to purchase the Vermeer TG400AL Self Loading Tub Grinder with anti-throw device in 2000.

We now have 2 TG400AL Tub Grinders covering the UK on a contract to hire basis, grinding both wood waste and green waste.

Services

Re-Cycling (2 of 2)

Murtagh have been processing Liverpool City Council green waste for the past seven years and in that time have also worked for Manchester, Oldham and Luton Councils.

The Tub Grinders have worked from Cornwall to Scotland, processing wood waste and green waste for static operators, recycling on their site for land clearance works, as well as commercial and residential developments.

Case Studies

Oil Tank Dismantling

Murtagh undertook the dismantling of an oil tanker, 25M in diameter and 16M high, within an operational plant. This task was carried out just meters away from building that continued to process fuel and oil products throughout the dismantling of this tank. The dismantling of this tank was carried out using cold cutting methods to prepare the tank to be cold cut by a 25M long reach excavator with shear attachment.

Case Studies

Asbestos Removal & Hospital Demolition

This is the second large hospital that Murtagh have been involved in carrying out an extensive asbestos removal contract prior to demolition works commencing. Large volumes of tiles, timber and bricks were salvaged from the works along with a crushing and screening operation processing 60,000 tonnes of 6F1 Grade 8 and Type 1 material for re-use on the site.

Case Studies

Complex Town Centre Demolition

This particular job was in a town centre. Murtagh were nominated demolition contractor due to our experience in successfully completing projects of such complexity.

The building to be demolished was a three storey brick structure with basement, adjoining a jewellers shop and County hall. The works had to be carried out by hand demolition with the only access being out onto the main street.
