# ***THANKS***

To all riders who entered, especially the 106 who rode.

Conditions were dry and sunny, with a reasonable temperature. The weather station at Credenhill showed the wind was a light south-westerly, which made it fast to the turn and not so bad coming back (on the sheltered side).

Perhaps because of several days' fine weather, many riders were a little off their LTS's but 35 (nearly half the Main field) found the extra strength to PB. It seems this time there was only one competitor who underestimated getting to the Start, but even he didn't need to be started late.

Only 8 entrants DNSd out of the 114 total: illness accounted for several; 2 riders DNF'd because of punctures.
