

## Louvrehouse Opening Louvre Roof Information.

Relax Outdoors are the West Australian distributors of the fantastic Louvrehouse opening louvre roof system. The Louvrehouse system gives a controllable environment at the touch of a button, where the blades can be opened to let in cool air, angle them down to catch the warm winter sun or close them completely to protect from the rain.

The Louvrehouse system is fully engineered for all wind zones and is a proven quality product which has been successfully sold in the Eastern states and South Australia for many years, with the designer of the system involved in the industry for over 20 years.

The Louvrehouse opening louvre roof blade is extruded from a marine grade aluminium, for longevity in the harsh Australian climate. The blades are designed with smooth lines and an attractive finish while achieving market leading spans of up to 4000mm.

Louvrehouse support the Australian economy and have their aluminium extruded in South Australia and most other components manufactured around Australia, with the motor being the only imported item from Europe.

The blades overlap each other when closed, and have a double seal extruded into the blades, to seal against rain passing between. They are fitted with a 1 deg fall to aid water run off and help prevent water pooling on the top. All water runs off into a neat extruded aluminium gutter, which fits around the inside of the frame, making the roof 99% waterproof.

The power requirement for the Louvrehouse system is 12 volts and on most occasions a transformer is simply plugged into a standard 10 amp socket in the house, meaning only a low voltage cable is run to the motors and rain sensor, with a rain sensor fitted as standard on every roof.

Relax Outdoors have received extensive training from Louvrehouse on their system including design, manufacture and installation. We have a background in aluminium fabrication and specialise in one off design of different shaped roofs including pyramid or triangle. We have installed opening louvre roofs for WA builders at up market show houses including APG at Jindalee, Gemmill homes in Wandii.

If you would like any further information on the fantastic Louvrehouse opening louvre roof system please contact Relax Outdoors using the details below.

Regards

Chris Wild (Director)
