

BRAZIL - 2014

13th Oct – 23rd Oct `2014

HIGHLIGHTS

Either for rarity value, excellent views or simply a group favourite.

- Harpy Eagle
- Hyacinth Macaw
- Maguari Stork
- Horned Sungem
- Fiery-capped Manakin
- Blue-winged Macaw
- Greater Rhea
- Red-legged Seriema
- Dark-billed Cuckoo
- Common Potoo
- Lettered Aracari
- Band-tailed Antbird
- Black-faced Tanager
- Cinnamon Tanager
- Neotropic Otter
- Red Brocket Deer
- Marsh Deer
- 5 Jaguar's
- Sunbittern
- Chapada Flycatcher
- Nanday Parakeet
- Collared Crescentchest
- Curl-crested Jay
- Golden-collared Macaw
- Great Potoo
- Biscutate Swift
- Band-tailed Manakin
- Gray Monjita
- White-rumped Monjita
- Red-crested Cardinal
- White-banded Tanager
- Southern Tamandua
- Black-tailed Marmoset
- Giant River Otter
- Brazilian Tapir
- Sungrebe
- Green-and-rufous Kingfisher
- Helmeted Manakin
- Long-tailed Ground-Dove
- Blue-crowned Parakeet
- Red-and-green Macaw
- White-eared Puffbird
- Great Rufous Woodcreeper
- Red-billed Scythebill
- Sulphury Flycatcher
- 20 Burrowing Owls
- 100 Mississippi Kites
- Black-capped Donacobius
- White-rumped Tanager
- Swallow-tailed Hummingbird
- Dark-throated Seedater

SUMMARY:

Once again we set off into the magical Brazilian Pantanal an area now very familiar to Zoothera. This trip was a great success with many outstanding and very memorable experiences. Amongst our bird sightings we were privileged to witness a pair of magnificent Harpy Eagles bringing sticks into their nest and then watched mating, a sight very few people have ever seen. Of course the Hyacinth Macaws around our lodge were a delight as always and several mammals got voted high in our ratings. We watched 5 Jaguars from our boat trips on the Cuiaba River, including prolonged views as they swam and walked along the river banks. A Brazilian Tapir that walked from 200 metres away to within 20 metres before it noticed us was a real highlight, as were the family of Giant River Otters on the Pixiam River boat trip. A very obliging Sungebe got eclipsed by a Sunbittern displaying with its wings fully open revealing the most amazing pattern imaginable. Endless waterbirds, storks, herons, ibis, and screamers, kept us busy in the wetlands while rare Chapada specialities were found in one fabulous morning of birding. Add to this superb lodges located in just the right areas and an excellent variety of food and it's easy to see why this is one of our more popular tours.

Two of our best sightings of the trip.

The pair of Harpy Eagles and a Jaguar

Cuiaba - Rio Claro - 14th Oct

With everybody arriving the day before our first day started with us leaving Cuiaba after breakfast and then heading towards the famous wetlands of the vast Pantanal. There were to be numerous roadside stops along the way resulting in a total of 102 species for the first day. Starting off we had a

nice flock of about 50 **Snail Kites**, but more impressive was a flock of around 100 **Mississippi Kites**. This is a rare boreal migrant through Brazil and this huge flock drifted past on their way to Southern South America. So birds came thick and fast with several of our targets soon on the list. Our first **Greater Rheas** were soon followed by Fork-tailed **Flycatchers**, **Grassland Sparrow**, **Great Black Hawk**, **Guira Cuckoo**, **Lesser Yellow-headed Vultures**, **Purplish Jay**, and then three very nice **Campo Flickers**.

We then got to see **White-headed Marsh-Tyrant**, **Rusty-collared** and **Black-throated Seedeaters** and a very nice **Long-tailed Ground-Dove**. As we passed more and more wetlands then more and more birds appeared. **Bare-faced**, **Buff-necked**, **Green** and **Plumbeous Ibis**. We then had **Savanna** and **Black-collared Hawks**, **Roadside Hawk**,

huge **Jabiru**, **Cocoi Heron**, **Whistling Heron**, **Capped Heron**, **Grey-necked Wood-Rail**, **Southern Screamer**, **Brazilian Teal**, and finally just before lunch the first of three **Red-legged Seriema**s. Our lunch was followed by a little birding around the gardens where we enjoyed close **Grey Monjita**, **White-eyed Parakeets**, and a

host of other species, including **Bay-winged Cowbirds**, **Rufous Hornero** and **Saffron Finches**. Moving on we took forever to travel 30km. Reason being there was just too much to look at.

Ringed, **Amazon** and **Green Kingfishers** were seen,

Unicoloured Black-bird, **Solitary** and **Yellow-rumped Cacique**, **Bare-faced Curassow**, **White-winged Swallow** and **Brown-chested Martins**. One particular small pool was very memorable as

it held **Roseate Spoonbills** plus two **Sunbitterns** including a

spectacular display when one of them opened its wings fully, revealing a stunning pattern. **Chaco Chachalaca** were seen as well as an **Undulated Tinamou** that walked across the road. In the same area **Brown Capuchins** with young jumped around the trees, **Monk Parakeets** attended their nests and we saw tiny **Black-tailed Marmosets** and lots of **Yacare Caimen** and **Capybara**. Finally we arrived at our lodge beside the Rio Claro.

Rio Claro - 15th Oct

Grey-crested Cacholote, the endemic **Chestnut-bellied Guans** were everywhere, **Blue-throated (common) Piping-Guan**, **Narrow-billed Woodcreeper**, **Purplish Jay**, some **Golden-collared Macaws** flew over, and a female **Bare-faced Curassow** walk through the gardens. After breakfast the bird feeders drew our attention with countless **Yellow-billed Cardinals**, **Saffron Finches**, **Bay-winged Cowbirds** and then finally some gorgeous and very localised **Nanday Parakeets**. After breakfast we drove a short distance to an area of forest and here we took a walk on a small trail. A **Pearly-vented**

Tody-Tyrant started off proceedings shortly followed by a showy **Ferruginous Pygmy Owl**. It was quiet and hot but soon we were treated to great views of **Crimson-crested Woodpecker** and **Chestnut-eared Aracari**. We then found a **Dark-billed Cuckoo** which eventually showed well, followed by **Great Black Hawk**, and then a mixed flock that held **Red-billed Scythebill**, **Streaked Xenops**, **Crested Becard**, **Variable (Epaulet) Oriole**, **Buff-throated Woodcreeper** and a little further on were **Orange-backed Troupial**, **Blue-crowned Motmot**, **Black-fronted Nunbirds** and a superb **Great Rufous Woodcreeper**. It was now really hot in the forest so we headed back toward the bus. A few **Black-tailed Tamarins** and **Azara's Agouti** were nice mammal distractions and some really nice butterflies added to an excellent morning. Back at the lodge the **Nanday Parakeets** were showing well, alongside several **Blue-crowned Parakeets** and some nice showy **Campo Flickers**. After a midday siesta or a spot of Dragon spotting for some of us, we met up for our afternoon boat trip on the Rio Claro. We set off and soon tallied up the **Ringed, Amazon, Green**, and later a very obliging **American Pygmy Kingfisher**. There were both **Blue-throated** and **Red-throated Piping-Guans**, **Turquoise-fronted Parrots**, **Pale-legged Hornero**, **Black-collared Hawk**, a **Cream-coloured Woodpecker**, **Toco Toucan** and then a very elusive **Sungrebe**. A **Neotropic Otter** swam past, a pair of **Black-capped Donacobius** put on a great show, as did a male **Great Antshrike**. As we slowly returned towards a superb sunset, a **Band-tailed Nighthawk** flew in front of one of the boats. After dinner we went on night drive in a large open topped jeep. Both **Common** and **Great Potoo** were spotlighted perched. We had a couple of **Marsh Deer**,

a **Brown Brocket Deer**, a **Tarantula**, a superb **Southern Tamandua** right beside the jeep, and on our return we saw **Crab-eating Fox** briefly, **Collared Peccary** and finally **Crab-eating Raccoon** and some **Boat-billed Herons** ending another great day.

Rio Claro - Hotel Mato Grosso - 16th Oct

This morning after breakfast we set out on another boat trip on the Rio Claro. Several **Turquoise-fronted Parrots** showed well and plenty of kingfishers were seen as well as **Aningas**, **Blue-throated Piping-Guans**, **Golden-collared Macaws**, **Bat Falcon** and then finally we got to see a **Sungrebe** which remained mostly hidden in the river edge. Moving along we found a single **Giant River Otter** and shortly after this we had the best views ever of a **Rufous-and-green Kingfisher**, finishing off all 5 of the Neotropic kingfishers. There were of course bucket loads of other birds seen before we headed back to the lodge for lunch. Afterwards we set off towards our next destination along the Transpantaneira. Many roadside stops were made for species we had already seen such as **Whistling Herons**, **Capped Herons**, **Jabiru**, **Black-collared** and **Savanna Hawk**, **Plumbeous** and **Green Ibis**. We got out in the blistering heat to look at **Rufous-fronted Thornbird**, **Greenish Elaenia**, **Chestnut-vented Conebill** and some **Small-billed Elaenias**. Further on we saw **Greater Thornbird**, **Orange-backed Troupial**, **Chotoy Spinetail** and **Barred Antshrike**.

We then arrived at our next lodge where we had time for an hours walk in the nearby forest. A few hings were seen including **Mato Grosso Antbird**, **White-wedged Piculet**, **Rufous-tailed Jacamar** a large **Tegu Lizard** and then as we walked back to the lodge we had absolutely fantastic views of a **Brazilian Tapir** that walked towards the grassy fields towards us until it eventually came to within about 20 metres before it noticed us and walked away. After dinner we saw a **Great Horned Owl** perched near to our rooms.

Hotel Mato Grosso - Porte Joffre - 17th Oct

This morning we had a short walk around the lodge grounds before an early breakfast. There were plenty of **Saffron Finches**, **Yellow-billed Cardinals** and **Bay-winged Cowbirds** all feeding together, and scattered amongst these were **Picui Ground-Dove**, **Picazuro Pigeon**, **Scaled Dove**, **Giant Cowbirds**, and best of all three stunning **Red-crested Cardinals**. Out on the termite mounds

was a **White-rumped Monjita**, and we also saw **Common Tody-Flycatcher**. After breakfast and close views of **Orange-backed Troupial** on the feeders we set off on a morning boat trip up the Pixiam River. All the regular kingfishers, herons and ibis were seen as well as a nice **Large-billed Tern**, **Spotted Sandpiper** and a fantastic group of seven **Giant River Otters**. We watched these for quite a while before heading back where we had a great close encounter with a **Sungrebe**. After the boat trip we took a short walk into the forest where we connected with **Buff-throated** and **Straight-billed Woodcreepers**, **Red-billed Scythebill**, **Flavescent Warbler**, **Mato Grosso Antbirds**, **Rusty-backed**

Spinetail, **Blue-crowned Trogon** and a very showy **Band-tailed Antbird**. Further on we saw **Grey-headed Tanager**, **White-lored Spinetail**, **Buff-bellied Wren**, **Rusty-fronted Tody-Tyrant** and **Forest Elaenia**. After lunch we set off on the final drive of the Transpantaneira to Porto Joffre. Along the way we made regular stops for countless water birds, most of which we had seen before. After watching a pair of **Great Horned Owls** we found the first **Maguari Storks** alongside the nest of **Gilded Sapphire**, and a perched **White-tailed Goldenthrroat**. There were also lots of **White-headed Marsh-Tyrants** around, plus **Unicolored Blackbirds** and **Southern Screamers** with chicks. Eventually we arrive at Porto Joffre Hotel.

Porte Joffre - Boat Trip - 18th Oct

Today we had an early breakfast before setting off on our 6 hour morning boat trip in search of the magnificent **Jaguar**. We stopped along the way to get good looks at **Black Skimmers**, **Large-billed Terns** and the smaller **Yellow-billed Terns** on a small section of sandy shore. There was also **Pied Lapwings** and **Collared Plovers** there. We then continued our search and eventually we were rewarded with a magnificent **Jaguar** sat on a bank under the foliage of a tree. Through the tree we could see his head and face and occasionally he moved around. Well that was OK for most people as it was their first Jaguar, but I had high hopes of better things and that's exactly what came next. We moved to another area nearby and had fantastic prolonged views of two male **Jaguars** swimming and walking along the river edge. Simply unbeatable! We could not have asked for better views.

On a high we returned for

lunch at the lodge. A look around the gardens and ponds after lunch found us **Lesser Yellowlegs**, **Solitary Sandpiper**, **Pectoral Sandpiper**, **Pied Lapwing**, 2 **Jabiru**, 2 **Southern Screamers** a whole bunch of nice dragonflies, and of course the best of all were a dozen or more **Hyacinth Macaws** perched and feeding in the garden Palm trees. Then we met up again in the afternoon for our second boat trip where we went in search of **Jaguar** again. Most of the birds we had already seen so looking for more Jaguars was no problem. Well we did find another **Jaguar** and this time a female walking and swimming and giving stunning views. Add to this **Capybaras**, and plenty of **Caiman**, and

both **Greater** and **Lesser Bulldog** (Fishing) **Bats** and it was a fantastic day.

Porte Joffre - Currupira das Araras - 19th Oct

This morning we were all a bit confused about time as the Brazil time had changed by an hour!!

Anyway once we had got together a short walk around the grounds found us a **Little Woodpecker**, **Hyacinth Macaws** and plenty of other regular species. After breakfast we set off back along the Transpantaneira. Stopping along the way we had some nice hummingbirds including **Black-throated Mango**, **Gilded Sapphire**, **Glittering-throated Emerald**, and **Fork-tailed Woodnymph**. We also got good views of **Southern Beardless Tyrannulet**, **Large Eleania**, and **White-bellied Seedeater**. Further on was a **Fuscous Flycatcher**, **Masked Gnatcatcher**, and **White-tailed Goldenthrout**. A walk along a trail into the dry forest produced, **Fawn-breasted Wren**, followed by some brief **Blue Ground-Doves** and then our target **Rufous Casiornis** and **Plain Inezia**. After our picnic lunch we found **Rusty-backed Antwren** and **Barred Antshrike** before setting off towards our next destination. Along the way we spotted **Greater Rheas** with lots of chicks. After our bus breaking

down and having to get it changed which was a pretty quick turnaround, we were on our way again. Eventually we arrived at **Currupira das Araras**.

Curupira das Araras - 20th Oct

Today we had a quick look around the lodge before breakfast and saw very close **Red-and-Green Macaws**, plus **Toco Toucans**, **Magpie Tanagers**, and lots of **Yellow-chevroned Parakeets**. After breakfast we headed for the nearby **Harpy Eagle** nest which was empty. A look around produced **White-eared Puffbird**, several **Lettered Aracaris**, **Yellow-tufted Woodpeckers**, some nice **Scaled Pigeons**, a **Moustached Wren** and **Greater Yellow-headed Vulture**. We then spotted a huge shape flying toward us and were treated to fantastic views of the male **Harpy Eagle** carrying nest material. That's was good but what followed was simply the best ever, and even more exciting when we heard that all other companies had missed seeing the Harpys so far this year! As we waited, both the male and female **Harpy Eagles** were spotted in a

tree before they flew in to the nest. To say the views were unbelievable was an understatement. If this was not enough then to watch a pair of **Harpy Eagle's** mating must rank as one of those all-time great birding moments. After a couple of hours enjoying these superb birds we left them still on the nest and made our back for lunch. Along the way we found **Brazilian Teal** and **Least Grebes** on a small pond, and beside a large pond was **Lesser Yellowlegs**, **Pectoral Sandpiper**, a **Black Skimmer**, **Black-throated Saltator**, and both perched **King Vulture** and perched **Red-shouldered Macaws**. Not a bad morning and yet another reason you should travel with Zoothera! Just ask around how many other groups failed to see the Harpy's. Not Us!!!! Our late afternoon walk in the forest produced **White-eyed Attila**, **Cocoa Thrush**, **Chestnut-eared**

Aracaris, and as we walked out of the forest at dusk we heard both **Southern Tawny-bellied Screech-Owl** and **Spectacled Owl**.

Curupira das Araras - Chapada de Guimaraes - 21st Oct

This morning we had an early breakfast and then a quick look at a **Grey-fronted Dove** on its nest beside the swimming pool. We then set of toward our next destination in the Chapada de Guimaraes. Our first stop along the way found us **Neotropical Palm Swifts**, a **Crane Hawk**, fly over **Red shouldered Macaws** and some nice perched **Orange-winged Parrots**. Our second stop beside a lake found us **White-wedged Piculet**, **Swallow-winged Puffbirds**, a pair of **Sulphury Flycatchers**, and a **Hook-billed Kite** that flew over, **White-tailed Hawk**, **Blue Dacnis**, and some **Sick's Swifts**. We then drove through Cuiaba and on towards our lunch stop. Along the way we did pass a couple of low flying **Swallow-tailed Kites**. At our lunch stop with its terrific views we spotted a flock of **Biscutate Swifts**, very close **Yellow-tufted Woodpeckers**, and feeding on the

flowers of a flamboyant tree were **Black-throated Mango**, a **White-vented Violetear**, and nearby **Long-billed Starthroat**, and **Planalto Hermit**. We then continued on to our wonderful lodge where after a welcome drink we made a short afternoon walk. Around the swimming pool flowers were **Fork-tailed Woodnymphs**, **Glittering-bellied Emerald**, and another **Long-billed Starthroat**. Down in the woods we soon found **Flavescent Warbler**, **Pale-breasted Thrush** and then nice views of **Band-tailed Manakin**. Further on we had great views of a **Fiery-capped Manakin**. Further on we had great views of **Channel-billed Toucan**, **Swallow Tanagers**, **Variegated Flycatcher**, **Red Pileated Finches**, and a confiding **Brazilian Cavy**. At dusk a very confiding **Tropical Screech-owl** visited Steve & Gina's room where it sat on the light just outside their door.

Chapada de Guimarães - 22nd Oct

This morning a few people decided to spend the day around our beautiful accommodation while the rest of us set off for a day in the dry Chapada. As it normally heats up during the day we set off early in order to find the birds when they are most active. In grassland beside the lodge a nice **Wedge-tailed Grassfinch** showed itself and then arriving at our spot in the Chapada we were greeted by several **Swallow-tailed Kites** flying around and the calls of **Red-winged Tinamou** which as expected never showed themselves. A couple of Mississippi Kites were also seen before we scoped a stunning pair of **Blue-winged Macaws** on a close tree top. Further on were **White-eyed** and **Peach-fronted Parakeets**, plus **Cinnamon Tanager**, **Black-faced Tanager**, **White-rumped** and **Shrike-like Tanager**. We then enticed a superb **Collared Crescentchest** to show itself and it certainly did that as it posed and called from a very close dead bush. As we moved on a little we came across the first of at least 20 **Burrowing Owls**, all of which were totally unconcerned at our presence and allowed

close photographic opportunities. There were of course plenty of other birds around and we enjoyed seeing **Curl-crested Jays**, **Black-throated Saltator**, **Grassland Sparrow**, **White-eared Puffbird** and a bunch of flycatchers which included the rare **Chapada Flycatcher** and **Lesser Eleanias**. Beside several flowering bushes we got to see up to three **Horned Sungems**, although they never seemed to want to hang around for long. Because of the sandy tracks we were walking we were also able to do a little tracking and we found clear footprints of

Maned Wolf, **Brazilian Tapir** and **Brown Brocket Deer**. Our lunch was at a site where Brazil's largest cave system can be found, and while enjoying our fried chicken we found another **Horned Sungem**, and a **Swallow-tailed Hummingbird**. A look around some of the caves, followed by a thunderstorm and a very close pair of **Red-legged Seriemas** finished our day off and we returned to our wonderful lodge and the best fish dinner you have ever tasted. For those going on to Iguazu Falls the following day another adventure begins.

Many thanks for a wonderful tour – Steve & Gina

BIRDLIST FOR BRAZIL 2014

A = Number of species recorded on tour B = Number of days out of 9 recorded
C = Highest daily count N/C=No Count Cm=Common F/C=Fairly Common H=Heard

A	SPECIES	SCIENTIFIC NAME	B	C
1	Undulated Tinamou	<i>Crypturellus undulatus</i>	6	1 + 5 Heard
2	Red-winged Tinamou	<i>Rhynchotus rufescens</i>	2	Heard
3	Greater Rhea	<i>Rhea americana</i>	3	8 + 25 chicks
4	Least Grebe	<i>Tachybaptus dominicus</i>	1	8
5	Neotropic Cormorant	<i>Phalacrocorax brasilianus</i>	7	20
6	Anhinga	<i>Anhinga anhinga</i>	7	10
7	Southern Screamer	<i>Chauna torquata</i>	5	12
8	White-faced Whistling-Duck	<i>Dendrocygna viduata</i>	1	20
9	Black-bellied Whistling-Duck	<i>Dendrocygna autumnalis</i>	1	8
10	Muscovy Duck	<i>Cairina moschata</i>	6	12
