SUMMARY:

Ecuador has always been a great location for birders, especially those new to South American birding. There are a number of good reasons that make various experienced world birders always happy to return to Ecuador. There are many superb lodges and the birding is always productive with many new species including life birds found each day. There are also many different itineraries and trips to this country that all offer a variety of wildlife watching. This time our tours concentrated in the northern part of the country, combining two trips in one by doing the best of the Northwest and the best of the Northeast Ecuador, which resulted in great value to those who wanted to see a lot of beautiful and enthralling species within a reasonable budget, together with fascinating landscapes! For the first time birder in the country, each day brought 30 to 80 life birds with travel between major sites being mostly only minutes away!

The combination of these two routes was filled with 64 stunningly gorgeous tanagers, together with an amazing 65 species of hummingbirds. Some of the feeders provided up to twelve species at a single location. Birding in Northwest & Northeast Ecuador is certainly very productive and enjoyable. The lodges provided excellent meals and an easy base for a number of birding destinations visited each day. Our trip was well planned to focus on birding, and with excellent birding karma, we entertained ourselves strolling and enjoying the many avian encounters with a total of 525 species discovered during the length of the journey! Thanks to everyone whom helped made this possible, and without further ado here are the birds;

Toucan Barbet

One of the many fabulous species seen on our Northern Ecuador Bargain Tours

New for 2014 we will be running 2 Bargain Southern Ecuador Tours
