

The First Noel - all major and minor keys challenge!

Choose a 'key' (scale) and follow the formula above (don't forget to repeat the top line) ensuring that you only move step-wise (up a scale note or down a scale note) unless it tells you otherwise. The majors should sound right but the minors will be odd!

Stretch yourself by not just playing the 'easy' scales. Note also how the tune is built on the chord (1,3,5). Try also playing the exercise in harmonic (raised 7th), and melodic minors (raised 6th and 7th ascending, and according to the key signature descending) for a more thorough workout!
