

Deb Callaghan

ESSENTIAL BEAUTY

ABOUT ME

I have been trained in Eyelash Extensions for over 10 years now, and I am still as passionate about it today as I was the first day I picked up my tweezers.

I continually train and attend workshops and mentoring sessions keeping my skills up to date, to ensure I give my clients the very best.

8-9 Concord House, Washington, NE37 2AS

TRAINING

I originally qualified in Eyelash Extensions in 2010 with Glam Lash I then went on to train as a Master Lash Technician in 2014.

Since then I have attended 4 lash conferences, completed training in volume lashes and advanced styling with both London lash pro and lash tribe.

- Brow Lamination £25
- Eyebrow shape £8
- Eyebrow Tint and Shape £12

EYELASH EXTENSION AFTERCARE

For the first 12 hours:

Don't get your new eyelash extensions wet, avoid steam and hot temperatures ie hot baths and showers, saunas, swimming pools etc. Extreme moisture and humidity within this time will affect how your eyelash extensions last as it will affect the curing of the bond of newly attached lash extensions.

Thereafter:

Do not use any oily products or oil based products on your lash extensions, be careful when applying moisturisers and sun cream around the eyes. Always wash your lashes with a lash cleanser to remove any make up and natural oil debris from your lashes this will help your lashes last longer between infill.

Do not get your lashes permed while you have lash extensions, we also advise not having lash extensions applied for 8-10 weeks after a lash perm or lash lift treatment to allow a complete lash cycle to have taken place and for all the lifted lashes to be outgrown.

Do not apply mascara on adhesive area as mascara will weaken the bonds on your lash extensions due to the oil within the product it is effectively a remover for lash extensions.

Use only oil free eye make up remover.

Use in a downward motion, do not rub side to side as this can loosen the bonds.

Most of all, do not rub the eyes.

Maintenance

To keep up your lash extensions, you should attend regular maintenance sessions on a 2-3 week basis to keep the lashes looking full. At your infill/maintenance appointment any lashes that have naturally shed during your lash cycle will be replaced with new extensions and outgrown extensions removed and new ones applied.

I recommend you clean your lashes daily with a lash shampoo to make sure any natural oils and skin debris is cleansed away and will give you longer lasting healthy lash extensions.

Lash Shampoo

Use a foaming pump bottle (we can supply these to you in salon please ask your technician)

Add 1/4 Baby shampoo or specially formulated lash cleanser

3/4 Water (I always boil the water first and leave to cool)

Mix in the bottle and use the foam to cleanse the lashes, after month replace your lash shampoo.

Lash Aftercare products available to buy in the salon.

Foam pump bottle

£2 30ml bottle

£2.50 50ml bottle

Muslin Cloth 50p

Eyelash cleansing brush £2
