

## **Playground Project - Romania**

A very exciting project that builds on what Flame has accomplished with Maramures Social Services over the past 2 years. 18 months ago we supplied 16 new beds and some extra furniture for a home that looks after children and young adults with severe learning disabilities in Calinest, and 4 months ago, we were able to equip another home in Seghet with 12 new beds – again for use for people with the same health challenge. We have received letters of appreciation, and indeed these two places are very close to where Calin Rezmures – our practical assistant – spent the first 19 years of his life in an orphanage.

Out of the success of these projects we have launched the Playground Project – designed to create an outdoor space for therapy and recreation for those with severe learning challenge.

I visited the home 2 months ago to assess the feasibility and accountability of the site and those who would be in charge, and am confident in recommending this to our Flame family for support.
