

Northchapel Working Steam Show 2013

The show being only in its second year at this location saw a marked change around of exhibits and stalls which resulted in our stand having more space than last year allowing parking behind.

We set our 12 Mts. of tables with a shelf above to allow the 5 attendees ample space to show their turnings, which showed the differing turning techniques and styles off. Many compliments were paid over the 2 days on the diversity of items that were shown for sale.
