

Little Bird SOS

Decorative Dragonfly Wings Template

Print off the template below, stick the paper to card (a cereal box is ideal) and cut the wings out. You will only need one set of wings per dragonfly, we have given you two sizes to choose from.

You will now need a tomato puree tube. Cut off each end (don't use your best scissors) and then down one length. Carefully open up the tube and wash off any excess puree, on the inside, and dry. **The corners can be sharp so we recommend you cut a curve on each of the corners for safety.**

If you would like to paint the non-shiny side of your tube, use a little sandpaper to give a key for the paint to hold. We recommend using acrylic paint.

Use the template to draw around the cleaned inside of your tomato puree tube. Cut your wings. **Now go back to our website for information on how to make and attach a body to your wings.**
