

## Memory Wire Necklace

### What You Will Need

Memory Wire  
10 x 8mm Chinese crystals  
6mm Swarovski crystals  
Headpins  
Bead Frames  
Seed beads  
Diamante Spacers  
In addition you will require cutter pliers and a pair of round nose pliers.

Fig 1.

Fig 2.

Fig 3.

1. Thread a bead frame with a seed bead, a 6mm Swarovski crystal and another seed bead in the middle (Fig 1). Make a simple loop.
2. Trim off the head of a headpin and make a simple loop on one end. Add the same beads as per step 1 and make another simple loop onto the other end. Link this to your first set of beads and ensure all your simple loops are closed tightly (Fig 2). Make three strands, two with three links and one with four links.
3. Make a simple loop on one end of your memory wire (the wire is very stiff). Start to add your beads, thread on a Swarovski crystal, a diamante spacer, a Chinese crystal, another diamante spacer and a Swarovski crystal (Fig 3). Add the first of your three link strands, then thread on the same beads, add the four link strand and repeat until you achieve the pattern detailed above.
4. If you don't want the memory wire to show you can thread seed beads all the way around but you will need to start adding these on one side before threading on your pattern.
