

CVE Shop Insulated Duct Access Doors are designed for use on square and rectangular ductwork systems.

Manufactured from galvanised sheet steel – 25mm thick double skin construction, incorporating 45kg/m³ thermal and acoustic insulation. The frame is folded galvanised steel Z section with castellated edge tabs for folding over and securing to the duct.

Door fixings are made from galvanised half turn cams riveted on with galvanised keeper brackets fitted to the frame. One joint self-adhesive, fire-retardant foam gasket fitted to the inside of the door with the frame gasketed on the underside, to provide a positive seal between frame and ductwork.

CVE Shop Insulated Duct Access Doors with fish Tab style Access Doors are 'easy to instal' (simply cut a hole in the duct 30mm under the door size, fix the frame in place with a dolly and hammer, replace the Door and secure with Cam-lock Door fasteners) and the Tab Type Duct Access Door seals meet DW144 Classes A and B.

Square and Rectangular Tabbed Access Doors are available in 20 sizes to suit everything from visual access (100mm x 100mm) to man access (600mm x 600mm).

Options and Accessories

- Hinges
- Retaining Wires
- Handles

Square Access Doors are standard stock sizes.

Rectangular Access Doors are normally made to order (call for lead times).
