little flap to stick the chain together at the end

DIY PAPER CHAIN DOLLS

1) Print onto plain printer paper & give your dolls some colour!

2) Cut around the dashed outer rectangle lines

3) Now fold the rectangle into an accordian fold, squash it flat so there is one doll visable on top

4) Cut that top dolls outline out. See red marking in example (you will be cutting through all the dolls at the same time here. Don't cut the edges!)

5) Unfold to see your paper doll chain

6) Repeat steps 2,3 & 4

7) Now you can glue all chains together!

3)

&

4)

cut where red
lines are

Lastly educate yourself on racism, then talk to your child in the most appropriate manner for them. Be inclusive of all colours, read books with characters who have different skin colours to your own. Buy toys that show diversity too!
