

## 12 Months Warranty.

### Committed to quality

Vapormatic's reputation has been built on an uncompromising commitment to ensuring the highest possible standards throughout the business.

This is evident not only from the awards and industry praise Vapormatic has received over the years, but from independent auditing and certification.

Only a company with such standards can confidently offer customers a full **12 Months Parts and Labour Warranty**. Vapormatic is the first and only such company in the industry to offer this level of warranty.

### 12 Months Parts and Labour Warranty

Simply put, if a part purchased from Vapormatic fails within the first 12 months due to a manufacturing fault, Vapormatic will not only supply a replacement part, but will cover all associated costs of restoring the vehicle back to the condition it was in before the failure ([terms and conditions apply](#)). Vapormatic is the first and only such company in the industry to offer this level of warranty.

### ISO9001:2008

This independent accreditation shows Vapormatic's procedures and policies throughout the business meet strict, internationally recognised standards. The business is audited twice a year to check we are maintaining the level required.
