

CURRICULUM VITAE

Professor James Barlow

Brief summary

I have held a Chair in Technology and Innovation Management at Imperial College Business School since January 2003. Previous appointments include the SPRU (Science Policy Research Unit), University of Sussex, the Policy Studies Institute, and the University of Westminster. I received my BA and PhD from the London School of Economics and Political Science.

From 2003-2006 I helped establish and was Co-Director of the Innovation Studies Centre (now the [Innovation & Entrepreneurship Department](#)) and from 2006 to 2013 I was Principal Investigator of [HaCIRIC](#) (Health and Care Infrastructure Research and Innovation Centre). With the significant funding from the UK's Engineering & Physical Science Research Council, HaCIRIC grew to become globally the largest research programme on healthcare infrastructure. Since October 2013, I have been Associate Director of Research and Evaluation for [Imperial College Health Partners](#). I am also a member of the executive for the Northwest London [CLAHRC](#) and the Department of Health's Policy Innovation Research Unit ([PIRU](#)).

Since 2000 my research has largely focused on the structural and organisational challenges to the adoption of innovations in healthcare. Of particular interest is the relationship between innovation in healthcare technologies, services and infrastructure. I have led or been involved in many research and consulting projects around the world and have extensive experience advising government and industry on strategic and policy issues in healthcare, housing and construction. Prior to 2000 I was largely working on innovation in housing provision and other housing policy issues, including construction and supply chain innovation.

Date of birth

12 January 1957.

Qualifications

PhD (Economics) London School of Economics and Political Science.

BA (Hons.) (Geography) London School of Economics and Political Science.

Professional appointments

2003 – : Chair in Technology and Innovation Management, Imperial College Business School.

1999-2003: Professorial Fellow, SPRU (Science Policy Research Unit), University of Sussex.

1994-1999: Reader, University of Westminster, then Professor of Housing and Construction from 1998.

1993-1994: Research Fellow, Policy Studies Institute, London.

1984-1993: Research Associate, then Research Fellow, Centre for Urban and Regional Research, University of Sussex (also held a research fellowship at the Department of Geography, Open University during 1986-1988).

Research

Selected major healthcare projects and programmes as Principal or Co-investigator

NIHR Diagnostic Evidence Co-operative – Point of Care Testing. Funded by NIHR, £1m (2013-2018). Co-investigator. Imperial College London.

Health and Care Infrastructure Research and Innovation Centre (HaCIRIC). Funded by EPSRC under the IMRC programme, £12m (2006-2013). Principal investigator. Imperial College London, with Loughborough, Reading and Salford universities.

Policy Innovation Research Unit (PIRU). Funded by Department of Health, £5.5m (2011-2017). Co-investigator. Led by London School of Hygiene and Tropical Medicine, with LSE and RAND Europe.

Collaboration for Leadership in Applied Health Research and Care (CLAHRC) for Northwest London. Funded by National Institute for Health Research, £10m (2008-2013). Led by Chelsea & Westminster Hospital / Imperial College London Health Trust. Co-investigator and responsible for evaluation of CLAHRC programme.

Whole System Demonstrators programme evaluation. Funded by Department of Health, £2.3m (2008-2012). With City University (lead), LSE, UCL, University of Manchester, University of Oxford, Nuffield Trust. Co-investigator and theme lead.

Innovation Studies Centre. Funded by EPSRC under the IMRC programme, £3.3m (2003-2008 renewal to 2012 agreed in 2006). Co-investigator.

Other major healthcare projects as Principal or Co-investigator include:

'Evaluating a major innovation in hospital design.' Funded by NIHR SDO programme, £366,000 (2012-14). With Kings College London.

'Modelling service innovation in stroke care'. Funded by Department of Health, £110,000 (2007-2008).

'Supporting independence. New products, new practices, new communities'. Funded by EPSRC, £696,000 (2003-2006). With Dundee University, UCL, Barnsley District General Hospital NHS Trust).

'Telecare Planning and Implementation'. Funded by EPSRC, £410,000 (2000-2003).

Prior to 2000 the majority of my work focused on housing policy, with a number of projects funded by ESRC (7), the Joseph Rowntree Foundation (7) and Department of the Environment (5).

Government and industry advisory work: summary

I have been highly active in translating research findings into lessons for policy and practice. I have extensive experience advising and consulting for government and industry on policy and innovation issues in healthcare.

I have worked with companies across the healthcare technology and design and construction sectors, as well as medtech start-ups. I was a member of the healthcare advisory board for MITIE Group plc and chaired the healthcare advisory board for Willmott Dixon Construction Ltd.

I have advised government bodies on healthcare innovation issues, both in the UK and internationally, and have been a member of expert panels on healthcare innovation for the Department of Trade and Industry, Department of Health, European Commission, the Royal Society, the King's Fund and other bodies. I led inquiries into the uptake and spread of innovation in the NHS for the Policy Exchange and the evidence base for telehealth for the Department of Health; this helped shape policy in this area. I was also responsible for a

foresight project on future technology needs for an ageing population for the Department of Trade and Industry. I have given evidence on public-private partnerships before the Treasury Select Committee and evidence on healthcare innovation issues to other Parliamentary Committees.

Since October 2013, I have been director of research and evaluation for [Imperial College Health Partners](#). I am an advisory board member of the Guy's and St Thomas' Hospital Charity Strategy Committee, supporting major investment in local healthcare innovation projects in London. In July 2014 I was appointed as the new president of the [International Academy for Design and Health](#).

Prior to focusing on healthcare innovation I was extensively involved in advising and consulting on housing and construction industry issues. This includes mass customisation in housebuilding, the first in-depth exploration of the management processes involved in construction industry partnering, organising and leading a Department of Trade and Industry scientific mission to Japan on innovation in housebuilding, and the first detailed research on the prospects for converting redundant offices into housing.

Selected publications

Contributions to teaching

I am responsible for teaching on the MSc International Health Management course, and convenor for the courses on 'Managing Change and Innovation in Healthcare' and 'Evaluating Evidence For Managerial Decision Making'. At Imperial Business School I have also taught on modules on project management and biopharma. I supervise a number of MSc and MBA projects, and group projects on the Intercolated BSc degree in medicine. I currently supervise three doctoral students.

Other

Married with two children.

Near fluent in French, basic German.

Fellow, Royal Society of Arts (FRSA).
