

## **Hawkhill Hotworks Stock Currently Available** March 2020

Welcome to our Spring 2020 price list of available stock hand made by Colin & Lisa Badger!

These beautiful pieces are all in pristine condition, and ready to be delivered. They come with rubber bumper feet, and matt black superior etching paint over sandblasted clean metal.

All inset panels, whether fused glass, brass, wood, or stainless steel, are set in with silicone sealant which acts as a shock absorber as well as a rust inhibitor.

Brass and stainless steel panels are lacquered with a long lasting finish that preserves the patina of the metal. Stainless steel panels are first hand polished.

Seats are made with wood or Richlite, a recycled paper product bonded in layers with resin, having a warm feel, that can be left outside.

Pieces that are not made with woods can be left outside; ones that include wood can be brought outside but naturally need to be kept indoors in inclement weather.

Please feel free to ask about ordering anything made that you don't see here. This is just a listing of what is ready made, following a request made by several of our customers. Some pieces are discounted as old stock.
