Go-Pods are the perfect vehicle for every adventure!

These compact micro-tourer are part made by our factory in Portugal before be finished in our workshops at Southport, Lancs, UK.

Reducing the over all size and weight of a trailer yields many benefits and dramatically increases convenience & usability.

## Here's a list of features & points:

Go-Pods are compact, rugged, all weather micro-tourers.

They're small enough to access many sites and areas that other full size caravans and motor vehicles simply cannot reach.

They tow beautifully, being designed not to snake or wobble & this opens up a world of adventure to those normally put off by towing.

Their compact size means they're easy to store, (often even in a garage), so they're at hand, packed ready to go at a moment's notice.

They're fully insulated and have dual fuel heating, so you can explore all year, either on or off hook up.

Once at your destination, you have the use of your tow vehicle to explore, without having to break down your campsite to do so.

There are no seams to leak or panels to dent. The GRP, (which can be ordered in any colour), has an impressive lifespan.

There's a large awning for additional living space whenever it needed & the option of a bedroom tent for extra accommodation too.

Campers will love the minimal set up time involved - just wind down the two rear stabilisers and you're done!

Quick to pack up too - whatever the weather. No wet fabrics to dry out before you go - or at home afterwards.

Excellent comfy king size bed but also the option of single bunks too..

The spec also includes a seating area, sink, 2 burner hob, fridge, solar power, toilet etc.

Ideal for single travellers, couples or young families.

None of the additional vehicle running costs that are associated with motorhomes & campers - and no huge depreciation either!

The ultimate blend of comfort and convenience - great for every adventure from short breaks to long, international road trips.

Photos available on request.
