before piecing together

Glove Template

This template has the right hand view facing you.

Once everything is pieced together the templates are then reversed to create the left hand side.

Join the paper pieces of the trunk first, levelling the the base and the side where indicated. Glue all pieces on to card and then cut out.

The measurement around my knuckles is 22cm with an open hand and 23cm with a closed fist.

The double headed arrow indicates the direction of the main stretch of the leather.

Palm View

Right hand view

(reverse for left).

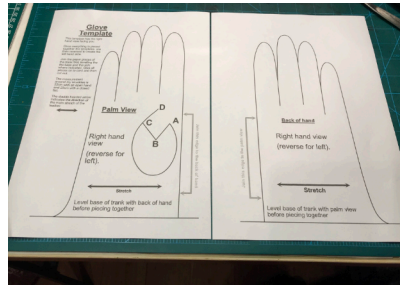

Join this edge to the back of hand

Level base of trunk with back of hand before piecing together

Joining your pattern pieces

1. Print everything to the correct size - check test square first.

2. Cut one side of your trunk off. I removed the edge on the back of the hand, where it says to join this edge to the palm view

3. Use a ruler to level the base of the pattern. Place the cut edge over the palm view and line up so both pattern pieces meet. Tape into position.

The Smart Stitcher

4. Rough cut around all pieces, leaving a small border, 1cm or so. Glue all paper templates onto craft card and cut out. Make sure you label all pieces, especially for the left and right sides.

5. You just need one furchette as this piece will be reversed when marking your leather.

6. Check out my YouTube tutorial on how to assemble this pattern - Elizabeth Bond The Smart Stitcher

Fourchettes, cut 12: 6 facing one way and then reverse the template for the other 6.
