

Jo Sonja's Polyurethane Water Based Varnish

Durable Formulation for Indoor and Outdoor Use

Use with Jo Sonja's Artists' Colours

Available in Gloss, Matte and Satin finishes

Clear, non-yellowing, quick drying

Durable formula for indoor and outdoor use

Approximate coverage: 1oz = 8 square feet 1ml e = 251 square cm

Directions:

- A coat of Clear Glaze Medium is recommended as a barrier coat prior to varnishing, depending on the climate and humidity
- User varnish full strength. If thinning is necessary, add drops of Flow Medium or Retarder. Do not over dilute.
- Before using, roll the bottle gently to ensure contents of bottle are well mixed to disperse matting agent. Try not to shake, over-shaking may cause bubbling.
- Apply in thin layers in a criss-cross motion, using a soft but firm bristle brush suitable to surface size.
- Smooth coat with final brushstrokes in the direction of the wood grain.
- Allow to air dry a minimum of an hour before applying additional coats. Drying time varies depending on climate and humidity.
- Apply three coats before sanding. Sand lightly if 24 hours have lapsed between coats, to ensure adhesion.
- For alcohol resistant finish or for outdoor use, apply a minimum of 4 to 5 coats of varnish. Allow varnished item to cure a minimum of 2 weeks before use.
- A hair dryer may be used to speed **surface** drying. Hold away from the surface and avoid excessive heat, which could cause crazing.

Clean up with mild soap and cool water.

Note: Not recommended for use over:

Oil based paint or antiquing finishes or polystyrene foam.
