(Recommended to pinpoint issues as fast a possible)

Services Required (Tick as required)

Inspect Turbocharger & supply quotation of repair

Other (Please describe):

Inspect Turbocharger & supply quotation to upgrade

Calibration of Variable Vane assembly & actuator

Customer Name:

Customer Address:

Customer Contact No: (Preferred)

Customer Contact Email Address: (Preferred)

Notes:

Please provide as much information as possible to allow us to provide a fast efficient service. We recommend vehicle ECU is read with any fault codes noted before Turbocharger removal, This will ensure any intermittent issues are identified especially with regards to electronic actuators/sensors where real world conditions cannot always be replicated on testing equipment.
