6. Operation

6.1. Registration

The software (iOS version) can be downloaded from the app store, and the Android version can be downloaded from the application store of Google play.

6.2. Connect lock to the phone

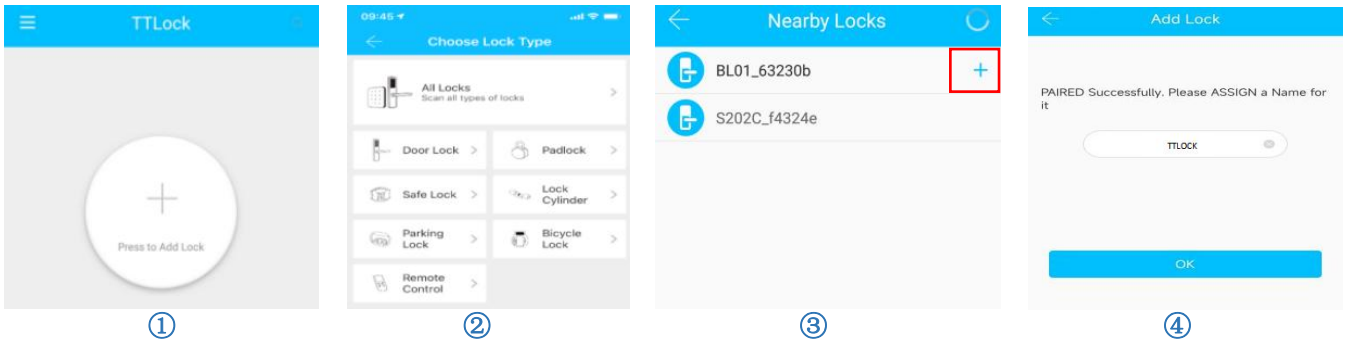

- 1) please scan the QR code to download the app
- 2) You can also search for TTLock in the APP store(Google Play)to download
- 3) Register a new account (phone number or email) or login with an existing account.
- 4) Touch the lock screen to light, click "+ Add Lock"
- 5) The lock nearby will appear on the phone screen, Click "+"
- 6) Re-name the lock
- 7) The lock added successfully

A screenshot of the "Register" screen in the app. It features a blue header with a back arrow and the word "Register". Below the header are two tabs: "Phone" (selected) and "Email". The form includes fields for "Country/Region" (set to "American Samoa+1684"), "Enter your Phone number", "Password between 6-20 chars", "Confirm Password", and "Verification Code" with a "Get Code" button. A "Register" button is at the bottom.A screenshot of the "Login" screen in the app. It features a blue header with "Login" and "Register" options. Below the header is a blue hand icon. The form includes fields for a phone number (starting with "185") and a password. A "Login" button is at the bottom, along with a "Forgot Password?" link.

TTlock users can register the account by mobile phone and Email which currently support 200 countries and regions on the world. The verification code will be sent to user's mobile phone or email, and the registration will be successful after the verification

6.3.Add locks

TTLock supports multiple types of lock devices. The lock needs to be added by the app after entering the add mode. Generally, a lock that has not been added, as long as the lock keyboard is touched, it will enter the add mode. The default password is 123456 if not added by the phone.

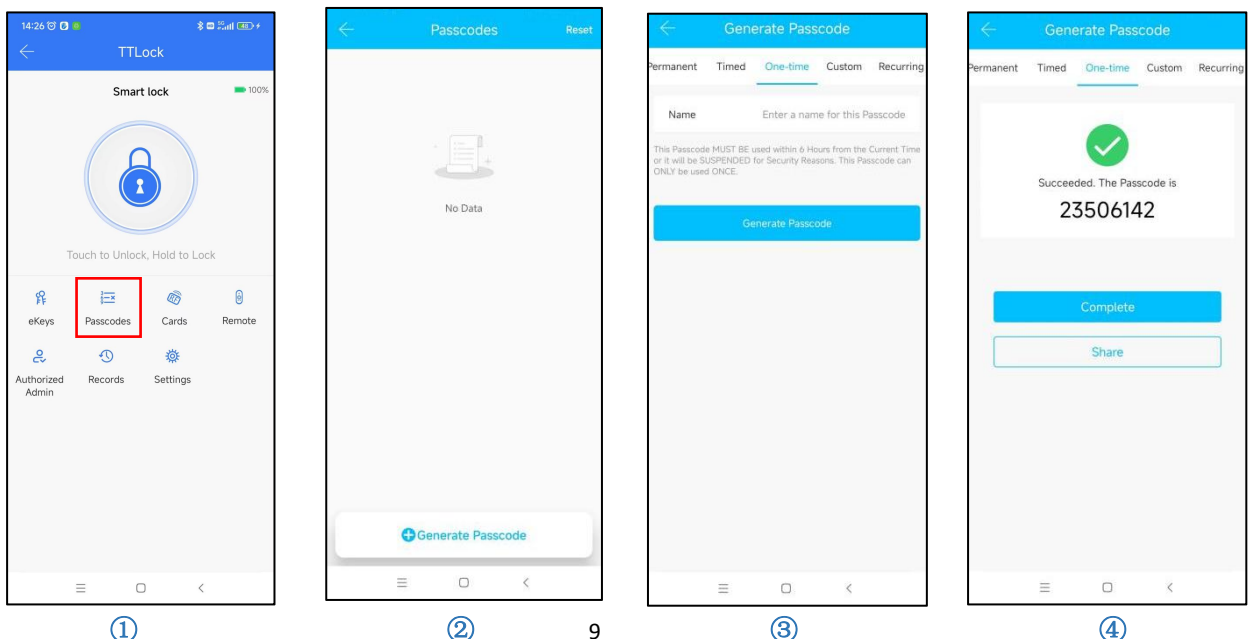

6.4.User Management

6.4.1.Bluetooth management

Make sure there is no problem with Bluetooth communication. After connecting the phone to the door lock as above, Click "  "to unlock.(the phone is within 5meters from the door lock)

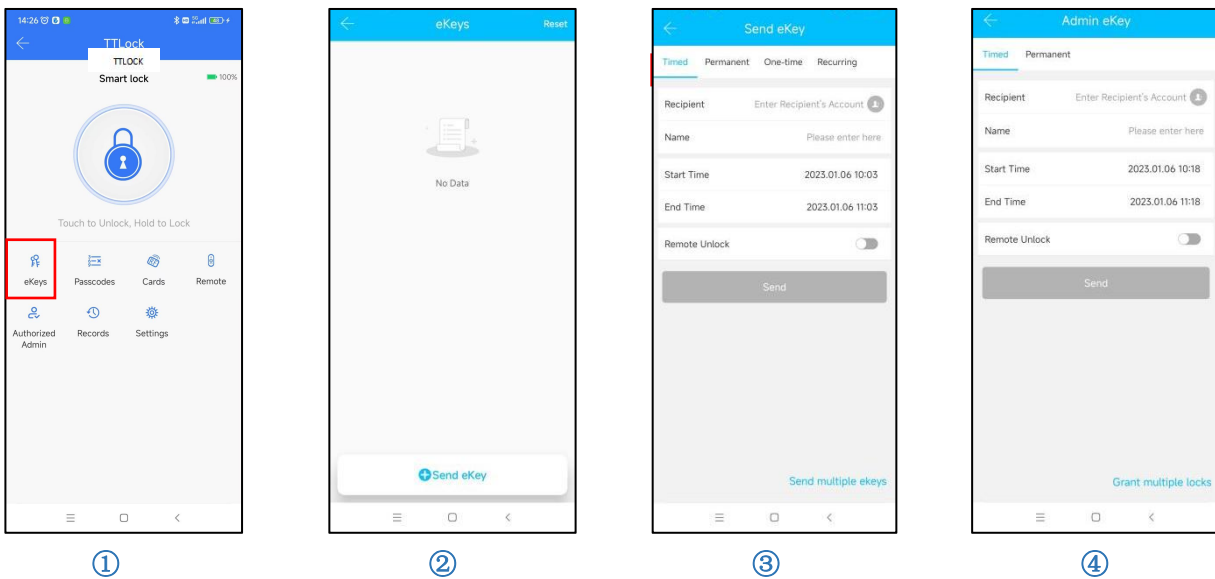

6.4.2.Setting Passcode

Passcodes are also a way to unlock. After entering the passcode on the locked keyboard, press the unlock button in the lower right corner to unlock. Passcodes are divided into permanent, timed, one-time, custom, recurring, and erase.(You can share the Passcode to other user via SMS, Email, Messenger, Whatsapp)

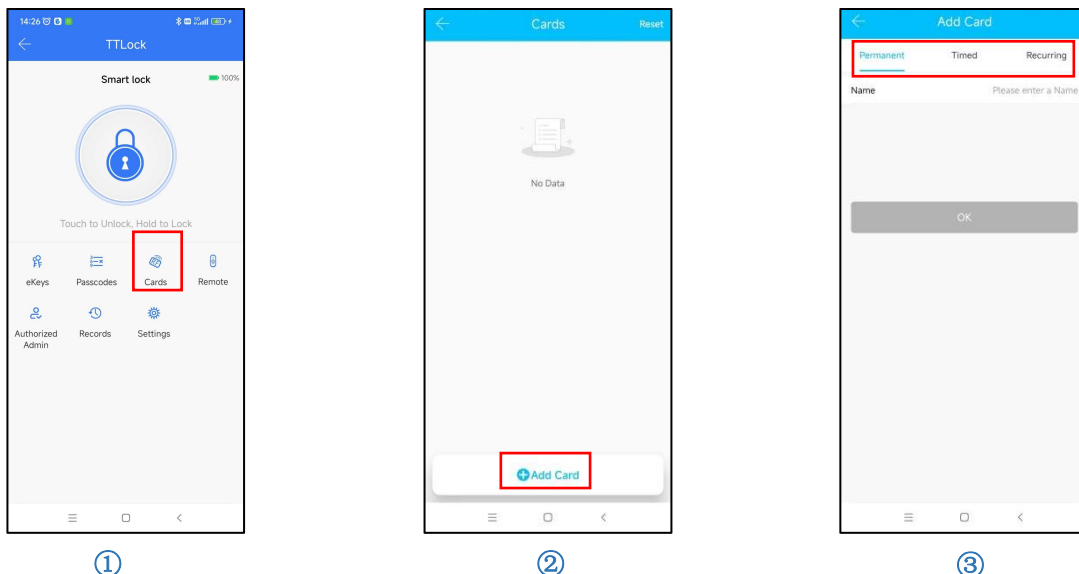

6.4.3. Send e-Key

Click on the "  " as shown in figure, you can send the eKey to other users of TTlock to authorize the unlock (the receiver must be download the APP and set up an account) → Select e-key format (Timed, permanent, One-time, Recurring) → Enter recipient's account of TTlock, set the name and effective time of the eKey, Can choose to allow remote unlocking or disallowing, authorized administrator or not authorized, as shown in figure → Send → The recipient's account has Bluetooth unlock permission.

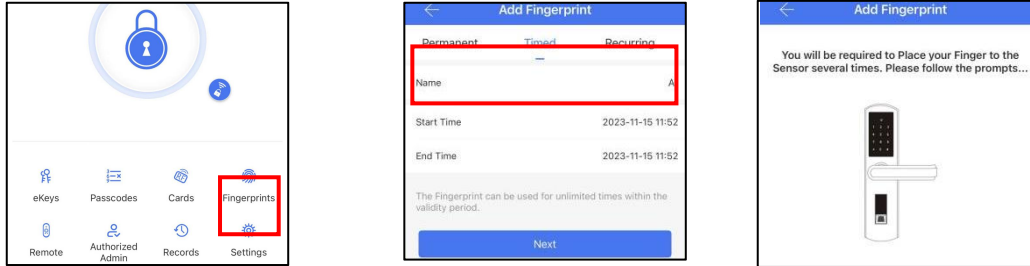

6.4.4. Add card

Supports opening doors through various IC cards. Before an IC card is used to open the door, it needs to be added first. The adding process needs to be performed by the app beside the lock. The validity period of the IC can be set, it can be permanent, timed or recurring.

6.4.5. Add fingerprint

The premise that a fingerprint can be used to open a door is that it needs to be added first. The adding process needs to be performed by the APP beside the lock. The fingerprint expiration data can be set, it can be permanent, or it can be limited. After setting ,you can modify its validity period.

6.4.6. eKey management

Click "  " The manager can delete ekey, reset ekey, send and adjust the ekey, meanwhile he can search the lock record.

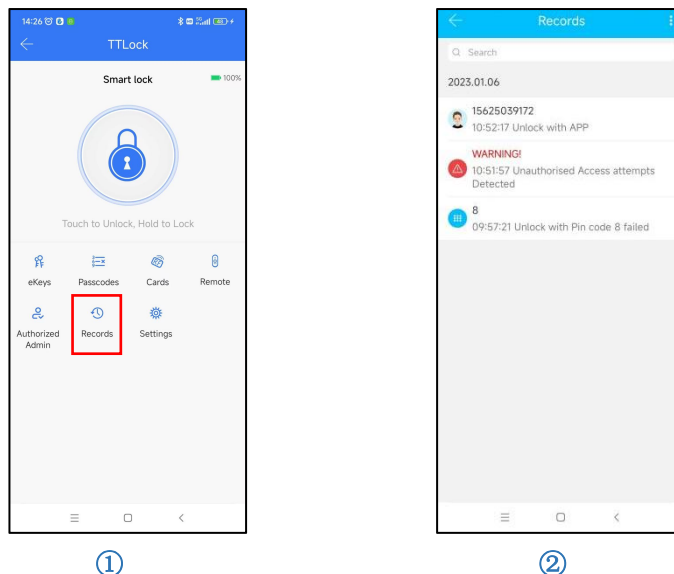

6.4.7.Passcode management

Click "  " .All generated passwords can be viewed and managed in the password management module. This includes a password change, password deletion, password reset, and password unlock record.

6.4.8.Unlock records

Click "  "you can query your unlock record as shown in figure.

 Records

6.5. Gateway management(Optional)

The TT lock is directly connected via Bluetooth, that is why it is not attacked by the network. The gateway is a bridge between smart locks and home WIFI networks. Through the gateway, the user can remotely view and calibrate the lock clock, read the unlock record. Meanwhile, it can remotely delete and modify the password.

6.5.1. Add Gateway

Light Status

When the gateway is powered on:

- Light flashes alternately in red and blue: Stand-by mode, ready for pairing
- Blue light: Working mode
- Red light: Network failure

Pair the Gateway with APP

1 Activate the APP

2 Press "☰"

3 Select [Gateway]

4 Select [G2]

5 Plug in the gateway and power it on, while the light flashes alternately in red and blue

6 Press "+" sign

7 Add Gateway

8 Select the network and fill in the password

9 Add complete

⚠ Notice: If times out, please power off and try it again.

6.5.2. Manual

After a short period of time, you can see which locks are in their coverage in the app. Once the lock is bound to the gateway, the lock can be managed through the gateway

7. Reset the Lock

Please note all data will be erased if you reset your lock to factory default.

8. Replace Batteries

Please use 4 high-quality alkaline AA batteries for replacement when the battery is dead.

9.5V Emergency Power

Micro USB interface is used to connect regular 5V power bank to activate the lock in case the battery is dead.

Note: The Micro USB interface is only used for emergency unlock and cannot be used for battery charging.

10. Emergency Key Unlock

Emergency key can be used when the battery is dead.

Note: Keep at least one key outside your house so you can get it to unlock in case of emergency.

11. Keypad

The lock supports up to 16-digit Vague Code. Just enter any 16-digit code, as long as a correct code is included in what you entered, you can open the door.
