

# CCC MICROFIBRE GUIDE

## Why our microfibres?

Arguably the most important piece of kit in your detailing arsenal, here's a guide about our microfibres.

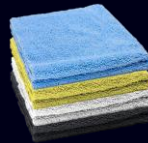

## You get what you pay for!

We've heard these words uttered many times and where your pride and joy is concerned, it's not worth skimping! Price doesn't necessarily dictate quality or indeed give you the full story on what you may expect! Knowing what's in your microfibre and how it's made will dictate whether the microfibre is any good!

### LARGE DRYING TOWELS

SIZE: 25" X 36"
