

Modern and stylish, the P-115 looks and sounds great in any environment.

P-115 combines superb piano performance with exciting features to inspire all pianists both at home and "on the road"

Features

A compact digital piano with a modern stylish design.

P-115 not only features great piano sound and feel - there's a whole range of additional features and even an App for controlling the instrument with an Ipad

Outstanding keyboard feel ensures an authentic piano-playing experience.

The P-115 features a Graded Hammer Standard (GHS) keyboard. The feel of the keyboard gradually changes according to the register, so that it feels heavier when playing bass parts and lighter when playing treble parts. The keyboard also features matte finish black keys for an authentic piano experience.

Enjoy the feel of playing a full concert grand piano

The P-115 uses Yamaha's "Pure CF sound engine," featuring a piano sound recorded from Yamaha's renowned CFIIS concert grand piano, heard on stages all over the world. In addition to the advanced piano sound, the improved damper resonance function recreates the reverberation of a grand piano, allowing for a finer level of nuanced expression.

Comfortable acoustic design suited to the player

The tweeter position has been redesigned in the P-115 to produce better tonal quality and offer a more enjoyable performance experience. This new configuration ensures that the sound of the instrument comes alive across the entire tonal range.

Features

Voices and rhythms that to support polished playing

While the P-115 can naturally be enjoyed as an authentic piano, it can also help to make your playing even more creative. This is perfect for people who want to enjoy a variety of musical styles and who want to increase their potential as performers.

Professional rhythm tracks for additional versatility

RHYTHM
