

Take a great piano with you wherever you go...

Authentic piano sound and response in a portable and compact design

Features

Graded Hammer Standard keyboard for an authentic piano-playing experience.

The P-45 features a Graded Hammer Standard (GHS) keyboard. The feel of the keyboard gradually changes according to the register, so that it feels heavier when playing bass parts and lighter when playing treble parts, just like an acoustic piano. The keyboard has a responsive, natural feel together with matte finish black keys for a truly authentic piano playing experience.

Improved Advanced Wave Memory (AWM) tone generator

The P-45 improves upon the traditional AWM synthesis system to deliver stunningly real piano sounds. AWM is a technology that uses digital recordings of original instruments and allows you to experience realistic grand piano sound wherever you are.

Compact and lightweight design for easy transportation.

Slim and stylish with a depth of less than 30 cm, the P-45 requires very little space and, at only 11.5 kg, it can be easily moved anywhere in your home or used for performance outside.

Simple operation with just one button

Many of the settings on the P-45 can be changed with a single button. Simply hold down the "GRAND PIANO/FUNCTION" button and press selected keys to change voices, play demo sources, configure the metronome, and so on.

Specifications

Size/Weight		
Dimensions	Width	1326mm
	Height	154mm
	Depth	295mm
Weight	Weight	11.5kg
