

A brand new design based on the traditional smaller bore size preferred by players around the world.

The Yamaha Z combines the tonal richness and depth of character of the older traditional flugels with the easy playability and superb intonation made possible by high-tech engineering. Inspired by legendary artist Bobby Shew, the Z features the perfect amount of air resistance to let you color the sound-your sound-exactly the way you want to. And it slots so nicely in the upper register you'll forget you're playing a flugel! A special 'Bobby Shew' signature mouthpiece is included which perfectly balances and complements the Z.

Features

Brand new design

A brand new design based off of the original YFH-6310Z Bobby Shew Professional Bb flugelhorn.

New trigger system

The newly designed third valve slide trigger is more ergonomic and will accommodate a wider range of hand sizes.

New leadpipe design

The YFH-8310ZG features a newly designed leadpipe, outer leadpipe area and a new connection brace between the leadpipe and the valve casing.

New top and bottom valve caps

The new top and bottom valve caps match the YTR-8310Z Bobby Shew Custom Bb trumpet.

Features

Vertical valve tubing

Traditionally, flugelhorns are made with vertical valve tubing.

Monel pistons

Monel pistons are resistant to corrosion and are an ideal choice for professional flugelhorn pistons which must retain precise fit and smooth action over many years.

Hand-lapped pistons and slides

Hand-lapping pistons and slides ensures an absolutely perfect fit and seal between the pistons and casing or slide parts. Such a perfect fit helps to achieve smooth air flow and smooth action and improve the response and intonation of the instrument.
