

# FELT STAR GARLAND INSTRUCTIONS

## You will need:

Lots of colourful felt,  
Embroidery thread to match  
your felt,  
Bakers Twine or string,  
PVA or Fabric Glue,  
Instructions & template,  
Sewing needle,  
Scissors

## Felt Star Garland Instructions:

Using the star template cut as many stars needed for the length of garland you require. The finished stars are 10cm wide approx. You will need to cut 2 stars for each star you want to make. Once you have cut all of your stars from your felt you can begin to sew them together. Sew each star together using running stitch. Before you finish sewing each star pop in some stuffing into each one before sewing it closed. Once you have sewn all of your stars you will have a lovely pile of felt stars! Now we can string them all together.

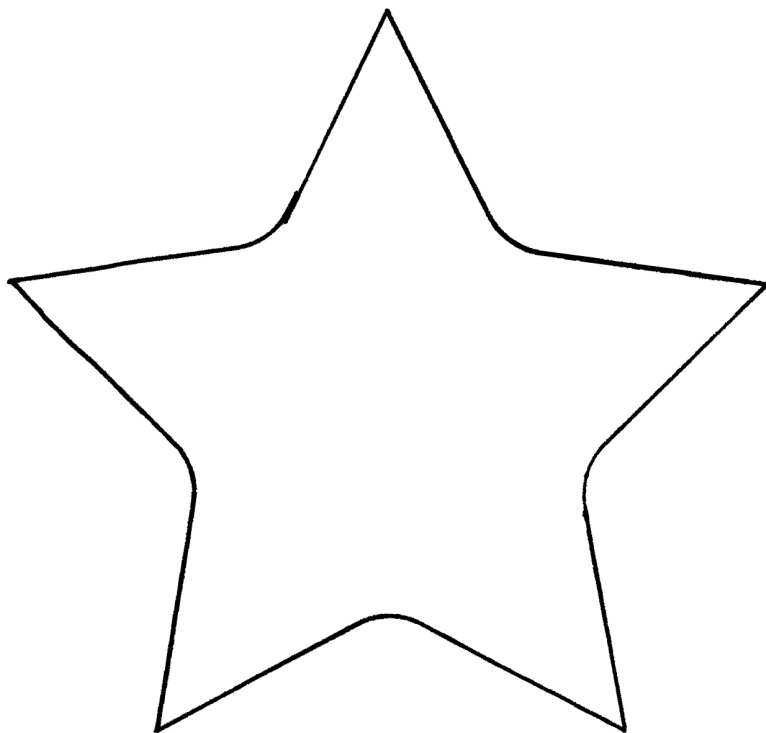

Cut your Bakers Twine or string to the length you require adding 90cm of twine or string to each end for tying up your finished garland. Thread the string or bakers twine in between the two pieces of felt at the top of each star, shuffling the star along the twine to where you want it to sit & keep adding stars until you've used all of your stars.

Once finished, hang your garland & enjoy your celebrations!
