# Design

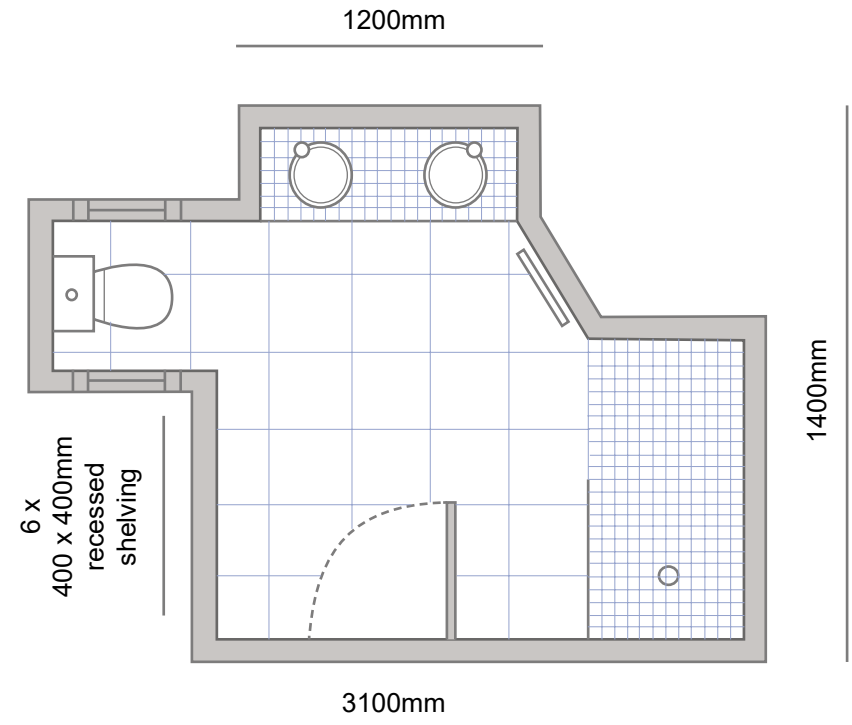

From site visit to CAD illustration

Bathroom Renovations // [Page Two](#)

We provide a Computer Aided Design illustration service to plan the layout and fittings in detail before the work commences.

This enables you to visualise your finished space. This is drawn to scale and is complete with dimensions. Not only does this give you an exact idea of how your bathroom will look, you can also see if the new layout creates any problems or space issues.

# Installation & Fitting

We professionally install and remodel bathrooms for a quality that will last.

As well as this, we offer maintenance call-outs as part of our plumbing services.

The work is planned around you and we consult with you at every stage of the project from the first design to the final towel rail.

There is a wide range of styles and fixtures to suit all budgets without compromising on the finish.

Our team of fully qualified

professional tradesmen cover every aspect of installation including plumbing, plastering and flooring, so there's no need to source multiple tradesmen. Work is completed in a timely fashion with minimal amount of disruption, so your bathroom is ready to use as soon as possible.

# Previous Renovations

This bathroom needed space planning to make the most of the space available.

A large walk in shower, his and her sinks and quality tiling throughout completes the project with a chic hotel room finish.

Bathroom Renovations // [Page Seven](#)

For a small bathroom storage doesn't have to be an issue with recessed shelving. Here it has been incorporated into this project again for space saving but also to complete the clients brief for a modern look.

A dividing wall was removed in this project to open up a larger space for the bathroom. This allowed for a shower and free standing bath.

Bathroom Renovations // [Page Ten](#)

The bathroom looks fresh, clean and modern.

Bathroom Renovations // [Page Eleven](#)

Bathroom Renovations // [Page Twelve](#)

Make a small bathroom look infinitely bigger with neutral colours that run along the floor. Really good storage is essential in a small bathroom as it conceals all the clutter, so making a small space feel bigger.

Bathroom Renovations // [Page Thirteen](#)

Loft space and showers, no problem. The layout was planned to include a shower and freestanding bath. White tiled walls help light circulate giving the feeling of a bigger space.

Wet rooms create a seamless space eradicating the need for showertrays and boxing off areas of the room.
