

# 2-SERIES VAN-PACK JETTER

## FLEXIBLE FINANCE

A range of finance options are available to help spread the cost of the jetter, the vehicle, interior conversions and additional equipment.

The 2-Series van-pack is a compact, lightweight, multi-purpose jetter with a comprehensive specification at a great price.

A popular machine with both small and large scale operators alike, the 2-Series is a fully-featured machine with a powerful 24HP diesel engine, hydraulic drive HP reel and integrated filling reel.

Single man operation can be added in the form of a remote control system or a hard-wired foot pedal system.

Suitable for cleaning and unblocking sewers and drains up to Ø250mm, the 2-Series can be installed into almost any commercial vehicle and is ideally suited to domestic and light commercial work. Its compact size means it is a good choice for use in CCTV vans.

The versatility of the 2-Series has also proved key with contractors using it for tough surface cleaning tasks. The machine can be supplied with a full range of accessories for drain and surface cleaning, fat and grease removal as well as descaling.

With a dry weight of only 395KG, it is one of lightest high-performance jetting machines in its class.

## TECHNICAL SPECIFICATION

Pipework Diameter	200-250mm
Performance	3000PSI @ 9GPM (200 BAR @ 40LPM)
Std Water Tank Capacity	210 Litres (45 Gallon)
Engine	3 Cylinder Diesel (Lombardini Kohler LDW1003)
Engine Power	24HP (18kW)
