

Stakeholder engagement meeting minutes

Stakeholder: Charlie Payne (CP), Dave Siswick (DS), Paul Say (PS)

Date: 11 JULY 2016 11.00am

Location: Payne's, Bar Lane, Roecliffe

Attendees: Dave Siswick (DS), Paul Say (PS)

Key points

- DS expressed the thanks of the Parish to CP for CP's support to date, in particular for the work done to limit noise pollution from the Dairy & supporting the villagers with access Roecliffe during the Christmas floods on Bar Lane
- CP noted the results of the survey, particularly the number and detail of responses
- DS & PS addressed the following subjects with AB

1. Litter

- Concerns regarding the level of litter in and around the Dairy were discussed. Particular reference was made to the blue hairnets
- CP noted that the Parish undertook a litter pick and advised that periodically members of his staff would do the same. This activity was encouraged to continue

2. Speed & volume of traffic on Bar Lane

- Volumes of Payne's traffic in and out of their premises are not expected to increase in the short to medium term
- CP reiterated commitment to highways speed limits. None of his drivers had been caught speeding when the Police last monitored Bar Lane
- People who work at Payne's are reminded internally to be considerate to the local community that they exist in
- Anti-social behavior i.e. urinating in the hedgerow outside of Payne's was discussed and CP committed to reinforce expected standards of behavior of his people
- Types of traffic calming measures were discussed. CP's view was that road furniture such as rumble strips; sleeping 'policemen' and 'chicanes' would slow down traffic but increase noise pollution and traffic congestion. He was more in favour of reducing the speed limit on Bar Lane and improving road signage including 'flashing warning' signs

3. Operational Licenses

- CP confirmed that all Licenses for the operation of vehicles were in order

4. Changes at Payne's

- CP advised that the land acquired and being developed opposite Absolute Fitness Gym was for the use of Payne's & specifically for parking vehicles filled with produce ready for delivery
- Development of the plot has been delayed due to archeological surveys but is expected to resume later this year (no date confirmed)
- CP also advised that Vehicle workshops may move in the near future to another site that Payne's has acquired/access to which will liberate further space in the Dairy yard for staff parking and loading/unloading of transportation

5. Grass verges

- CP continues to maintain grass verges in and around their premises

6. Feedback from CP

- Feedback was sought from CP for the Parish. None was offered

7. Working with CP going forward

- CP advised that continued updates via email are sufficient

Next steps

- DS & PS to share minutes of meeting with the wider Rocliffe & Westwick Neighbourhood Plan Committee (Committee)
