

It is with immense pleasure, that on our 30th - Celebratory Anniversary Summer School, to introduce you to the presenter of The Don Smart Lecture 2022, Rosemarie White.

Rosemarie will be using the current working title 'Legacy' and linking to the Summer School theme, 'New Horizons.'

Her introduction will talk about Don's Social interest, demonstrated, in the way that he worked to create what we all know as the 'Summer School' and in the context of the Adlerian world at that time.

Rosemarie's experience of Summer Schools and how it has evolved over the years in the framework of meeting the requirements of a more formalised world of teaching, training and expectations whilst establishing closer links with the international Adlerian community.

A focus on the importance of Social Interest in today's world and how our view of social interest may have changed, new interpretations and examples of social interest arising from challenges now.

In conclusion, Rosemarie will link 'Legacy' with 'New Horizons' and consider how the choices and decisions we make now will influence the future.

What do we want our legacy to be?
