

# Ecologi

Restoring our planet, together

# Who are Ecologi?

## Who are Ecologi

We're a team of people who think our planet is important.

We work with families and lots of different businesses like shops, offices and websites to help people make a positive impact on the environment.

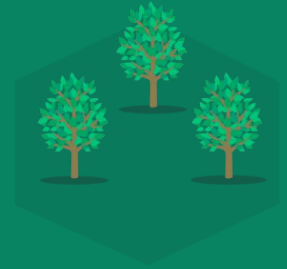

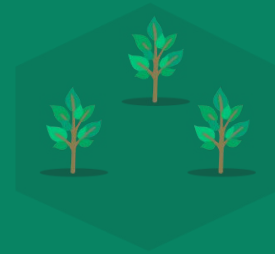

We believe, with a little help from everyone, we can work together to solve climate change.

# What do we do?

**We plant trees!**

**They start like this in a virtual forest...**

A lush, dense forest scene with tall trees and many ferns, appearing to be a real-life photograph. The image is filled with vibrant green foliage, including large ferns in the foreground and tall, slender trees in the background. The lighting is soft and diffused, creating a misty or foggy atmosphere. The overall composition is a dense, layered view of a forest.

**...but behind the graphics  
is a real life forest!**

An aerial photograph showing a stark contrast between a deforested area and a lush forest. In the foreground, a large, reddish-brown cleared area, likely a logging site, is visible. Several long, straight logs are stacked in neat piles on this cleared ground. The background is dominated by a dense, green forest of tall trees, partially shrouded in mist or smoke, suggesting a recent fire or heavy atmospheric conditions. The overall scene highlights the impact of logging on the environment.

**Around 10 billion trees are  
cut down every year**

**Trees are one of the best ways  
to solve climate change...**

Because they do lots of  
**amazing** things

## Amazing Trees

Provide  
homes for  
animals

Grow fruit  
and nuts for  
people to eat

Protect soil  
and stop it  
being washed  
away by rain

## Amazing Trees

Protect the  
seashore  
from storms

Remove  
carbon from  
the air

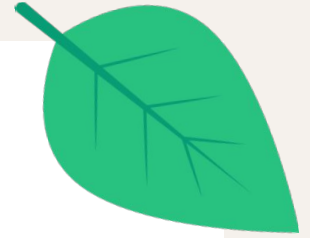

Make us feel  
better!

A young mangrove seedling with green leaves growing from dark, muddy soil. The seedling is positioned on the left side of the frame, with its stem and leaves clearly visible. The background is a blurred expanse of similar muddy ground with other small, distant seedlings.

**That's why it's so important  
to replant the trees that  
have been lost**

# Our special mission

We're working with our friends at OBON and The Million Tree Pledge on a very special project...

And we need **you** to help us

In June this year, The Queen is celebrating her Platinum Jubilee.

That means she has been **reigning for 70 years!!**

That's longer than any British King or Queen has ever reigned before, which we think is pretty special.

We're going to celebrate this special occasion  
by planting trees

**Not just 1  
tree...**

**Or 2  
trees...**

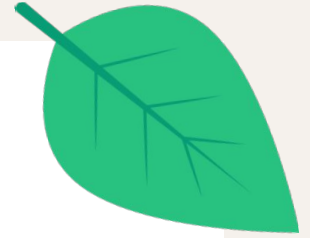

**10 trees...**

**Or even  
70 trees...**

**We're  
planting...**

**1 Million Trees!**

Our forest will be as big as  
**140 football pitches!**

# How you can help

We're asking schools across the UK to work together to help us plant as many trees as possible.

We're sure that with a little help from lots of people, we can plant **1 million trees**

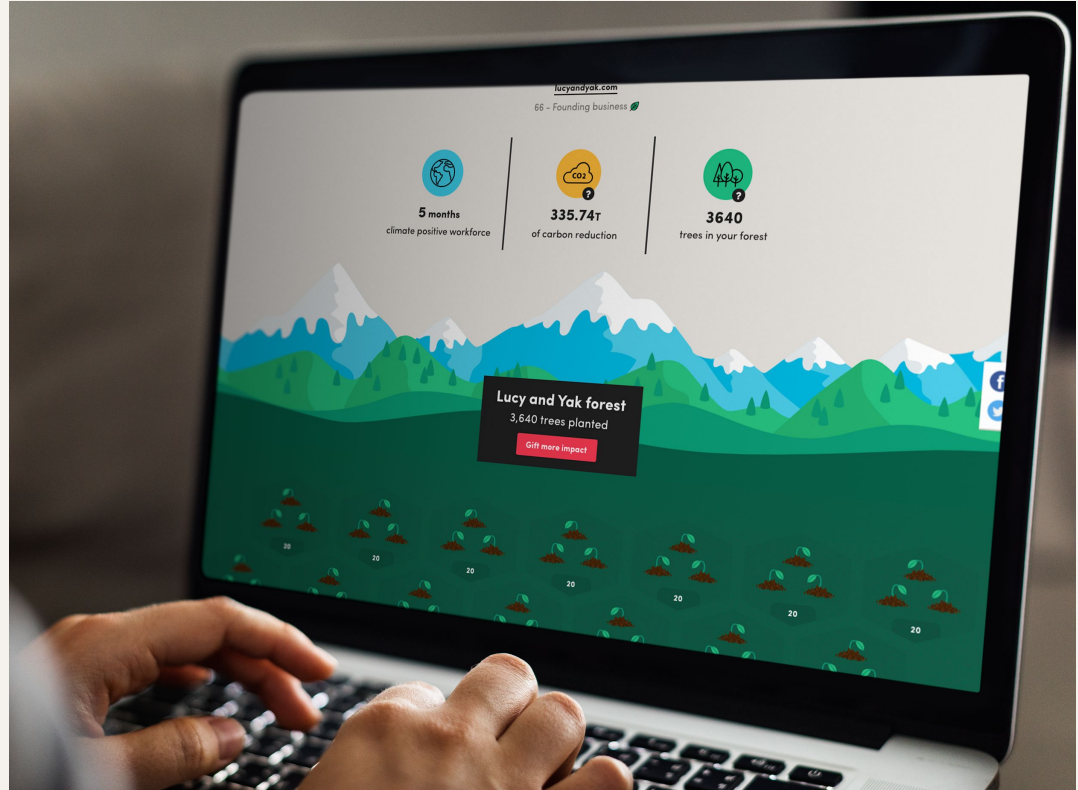

Your school can plant your very own forest where you can watch your trees grow.

You can learn about where in the world your trees have been planted.

And also earn badges for your achievements

**On you marks,  
get set...**

A photograph of two young saplings in a field. The sapling on the right is in focus, showing its dark brown trunk and several bright green leaves. The sapling on the left is out of focus. The background is a soft-focus green field with trees in the distance. The text "Get planting!" is overlaid in the center in a white, bold, sans-serif font.

**Get planting!**

# Ecologi

Thanks for your time.  
We're here if you'd like to get in touch
