THE SUSTAINABLE SEQUIN COMPANY

20% RECYCLED PET SEQUIN BESPOKE CUTTING | MARCH 2024

SERVICES PROVIDED

Any shape of sequin can be cut (1cm to 12cm), with any number of fixing holes, of any size, in any location.

The Sustainable Sequin Company can design and sample to your brief, complete the CAD artwork, provide a choice of colours and finishes of 20% recycled PET sequin film and cut the sequins! Alternatively you can provide your own artwork/specifications for us to create CAD designs from, or simply supply us with an Adobe Illustrator file to cut from directly.

DESIGN TIME | £30 | PER HOUR

Working to your brief to design sequins and produce stitched designs as requested

CAD DRAWING TIME | £30 | PER HOUR

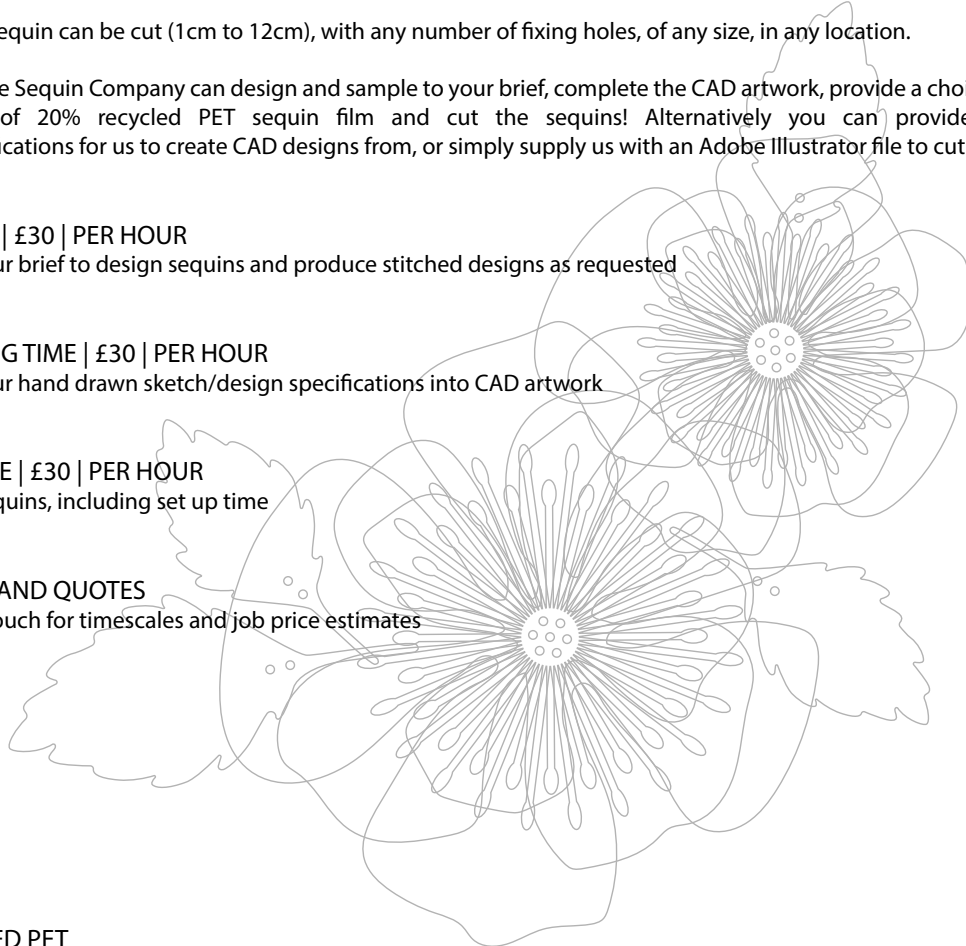

Translating your hand drawn sketch/design specifications into CAD artwork

CUTTING TIME | £30 | PER HOUR

Cutting the sequins, including set up time

TIMESCALES AND QUOTES

Please get in touch for timescales and job price estimates

20% RECYCLED PET

TSSC sequins are made from 20% recycled PET (polyethylene terephthalate) and 80% virgin polyester offering a more sustainable alternative to conventional sequins, which are made entirely from virgin plastics, often including PVC, which is harmful to human health during manufacture, use and disposal. Benefits of using a percentage of recycled plastic include: preservation of non-renewable fossil fuels, specifically oil; reduced energy requirements during manufacture and therefore reduced emissions; conservation of landfill space and/or reduction of toxic pollutants from incineration.

We're also investing in research for innovative and sustainable materials for our sequins.

ENVIRONMENTAL COMMITMENTS

At The Sustainable Sequin Company, we're dedicated to minimizing our carbon footprint and making a positive impact on our planet. We're actively working on measuring and reducing our environmental impact, and we'll be sharing our data and roadmap soon.

For every order placed, we plant a tree. We support carbon avoidance and capture projects, and maintain a 'Climate Action Workforce' through Ecologi. Additionally, we're proud members of 1% For The Planet, committing to giving back 1% of our earnings annually to environmental nonprofits for a healthier planet.

We've assessed our historical use of synthetic plastics, both recycled and virgin, and are committed to funding the collection of at least this amount of plastic waste by the end of 2024. So far we have funded the collection of 1,000kg of ocean-bound plastic waste (equal to 50,000 plastic bottles) through Plastic Bank.
